All doors can be clad in copper, bronze or stainless steel using the CWM woodwindows.com Fusion Method. This method allows for broad design flexibility with an extremely durable finish that will last for fifty years.

Front Doors of Distinction

*All our work is manufactured from genuine mahogany, (*Swietenia macrophylla*). It is seventy year old plantation grown and is the finest plantation growth mahogany on the planet. If you have a true commitment to using responsibly managed forest products, you can do so without compromise.*

Bronze Clad Exterior of Mahogany French Doors with True Divided Lites

All doors can be clad in copper, bronze or stainless steel using the CWM woodwindows.com Fusion Method. This photo is of the architectural bronze with six months of exterior exposure. It will continue to form a patina which adds to the beauty and interest as well as forms a natural protective exterior to the substrate below.
